Space Efficiency Matrix

Here we are analyzing store types to compare between store size and trends, and we will find that it doesn't depend on biggest size stores to achieve better sales or profit as we have **Deluxe supermarket (Store 13)** highest one in profit and this store is only **27SFT**

Top 5 Stores

Here we are analyzing top 5 stores by trends, and we have found that best store is **Store 13** in every trend

Recommendations

Here are our simple and easy to understand recommendations based on the dashboard insights:

01

Focus on the best brands and cities. They make the most money.

03

Buy more of the products that sell the best.

05

Copy the store layouts from the best stores and use them in other stores.

07

Give rewards to customers who spend a lot of money to make them buy more.

02

Fix quality problems for brands that have too many returns.

04

Sell more to married customers and people with medium income. They spend more money.

06

Watch sales patterns by month and hire more staff when sales are high.

08

Open new stores in areas where we don't have many customers yet.

Thank You
